

FAIZAN BASHEER

Full Stack Developer

Karachi, Pakistan • faizanbasheer38@gmail.com • +92 332 9874805 • [LinkedIn](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on production experience across web, mobile, and backend development, currently building scalable applications at Strug Inc Canada while pursuing a BSCS at FAST NUCES. Shipped apps to the Google Play Store, delivered custom Shopify storefronts, built REST APIs in Node.js, NestJS, and Go, and developed cross-platform mobile apps in Flutter. Experienced across the full stack with React and Next.js on the frontend and Node.js, NestJS, Laravel, and Go on the backend, plus additional expertise in Shopify, Firebase, Docker, and PostgreSQL.

EXPERIENCE

Software Engineer | Strug Inc Canada — June 2026 – Present

- Develop and maintain full-stack features spanning frontend and backend for a large-scale e-commerce platform using modern web technologies.
- Build, schedule, and maintain cron jobs and background automation tasks supporting core platform operations.
- Write and maintain scripts that harden CI workflows against supply chain risks, strengthening the security of the build and deployment pipeline.
- Identify, troubleshoot, and resolve production issues while enhancing existing functionality to improve performance and user experience.
- Build and maintain RESTful APIs and integrate frontend and backend services to support seamless application workflows.
- Collaborate with cross-functional teams, including frontend, backend, QA, and product, to deliver features in an Agile development environment.
- Utilize AWS services for application deployment, cloud infrastructure, storage, and monitoring, ensuring reliability and scalability.

Full Stack Developer | Halcon System — March 2026 – May 2026

- Led frontend development of the Smart DHA City Portal in Next.js, managing operational records for employees, vehicles, property, and workers across the authority.
- Delivered SSR and static pages with optimized SEO and fast load times, improving dashboard performance on key routes.
- Built the API integration layer connecting portal UI to backend services, enabling real-time data updates across multiple modules.
- Developed backend services for the Crescent project using NestJS, contributing to scalable API architecture and server-side business logic.
- Collaborated with backend and UI/UX teams to ship secure, role-based features in a production government-adjacent environment.

Full Stack Developer | Veriton Tech — September 2025 – Present

- Built and shipped two Shopify storefronts (Nora Lyf, Point Store) with custom Liquid themes, product management, and integrated payment flows.
- Developed cross-platform mobile apps in Flutter and web apps in React/Next.js, owning both frontend UI and backend API layers.
- Designed and deployed RESTful APIs serving mobile and web clients, integrated with responsive, user-focused interfaces.
- Delivered a PHP SaaS backend handling user authentication, subscriptions, and multi-tenant business operations for a client product.

Flutter Developer (Project-Based) | Orio Technologies — December 2025 – February 2026

- Built and launched the Order Management System app on the Google Play Store, handling inventory tracking and order workflows for field teams.
- Collaborated with UI/UX designers and backend developers for seamless app delivery.
- Debugged and improved a legacy mobile codebase, increasing app stability and reducing crashes ahead of handoff.

EDUCATION

FAST National University of Computer and Emerging Sciences, Karachi

2024 – Present

Bachelor of Science in Computer Science (BSCS)

Army Public Degree College, Karachi

2021 – 2024

Intermediate in Computer Science (ICS) • Matriculation in Computer Science

TECHNICAL SKILLS

Languages: C, C++, Python, Dart, TypeScript, Go, PHP

Web Development: HTML, CSS, React, Next.js, Liquid

Backend Development: Node.js, NestJS, Flask, FastAPI, Laravel

App Development: Flutter, React Native

Databases: MongoDB, PostgreSQL

Tools & Services: Firebase, Docker, AWS, Postman, Git, GitHub Actions, Prisma

Soft Skills: Communication, Problem Solving, Time Management, Team Collaboration

ADDITIONAL PROJECTS

- **Remote Work Tracker:** Express + TypeScript API managing orgs, users, attendance, tasks, payroll, compliance, and agent telemetry, paired with a Go agent for automated work tracking, plus a companion mobile app and web portal.
- **Order Management System App (Orio):** Flutter-based mobile app for inventory and order management, launched on Google Play Store.
- **AI Analytics Service (FastAPI):** AI-driven analytics service for remote teams providing productivity scoring, burnout risk detection, rankings, and insights that power the portal backend.
- **Blockchain Order Management System (OMS):** A secure and transparent order management system combining PostgreSQL for fast data storage with Hyperledger Fabric blockchain for immutable order history.
- **Enterprise Brain — AI-Powered Enterprise Memory & Intelligence Platform (v1.0):** Transforms disconnected enterprise data into a connected knowledge graph that serves as the organization's institutional memory — capturing knowledge, preserving decisions, mapping relationships, and enabling AI-driven reasoning across the company.
- **Zero-Trust Network Simulator:** A web application implementing a zero-trust security model with continuous verification of users and devices, featuring dynamic risk scoring, policy-based access control, and attack simulation; built with Spring Boot, PostgreSQL, Docker, and Angular.js.
